TENAGA SOLAR JAYA BORNEO COMPANY PROFILE

Energise Life With Solar

PowerUP
by TENAGA EV

About

Tenaga Solar Jaya Borneo Sdn Bhd is a Sarawak-based solar solutions provider helping homeowners and businesses reduce electricity costs with smart, compliant solar systems.

We focus on consultation-first design, ensuring every system fits your **actual usage, roof conditions,** and Sarawak Energy **regulations.** As a subsidiary of **Tenaga Solar Jaya Maju Sdn Bhd,** we combine proven expertise with a local approach to deliver maximum savings and reliable long-term performance.

Background

Tenaga Solar Jaya Borneo Sdn Bhd was established in **2025** as a dedicated Sarawak entity to better serve the growing demand for solar energy solutions in the region.

This allows us to provide **localized support, faster response,** and a **deeper understanding** of Sarawak Energy's rules and requirements.

As part of a wider solar group, we are a subsidiary of **Tenaga Solar Jaya Maju Sdn Bhd**, which has delivered multiple residential and commercial solar projects across Peninsular Malaysia since 2011 that bringing proven experience and technical reliability into our Sarawak operations.

Vision & Mission

Vision

To lead the transition towards sustainable living by making renewable energy affordable, accessible and impactful for all.

Mision

Delivering quality, reliable and customised solar solutions that maximise savings, minimise carbon footprints, and contribute to a cleaner, brighter future

Our Solutions

- Custom solar setups built around your electricity usage to help lower your monthly bills and boost your savings under Sarawak's NEM scheme.
- Scalable systems for businesses to cut running costs, improve energy use, and secure long-term savings.
- Real-time tracking to see your solar production and energy use, giving you clear control over your savings.
- A full assessment of your bills, roof, and NEM needs to make sure you get the right system size and performance.

Our Process

We check your electricity usage, roof condition, and overall suitability to make sure your system is planned the right way. Your system is custom-made to meet Sarawak's NEM rules so it deliver eligibility within the NEM requirements. All paperwork and utility submissions are handled by us. Our team installs and tests everything before activation. You continue to get support and monitoring to keep your system performing effectively all the time.

Why Solar for Sarawak

With subsidies of up to **RM12,000** available, solar has become significantly more affordable for Sarawak homeowners. Combined with the NEM scheme, this allows you to reduce your monthly electricity bills while building longterm savings. Acting early ensures you maximize both the available incentives and overall return on your system.
